

COURSE COST:

\$85 if you have not attended a previous course

\$76.50 if you have attended a previous course

\$25 for students or other healthcare professionals(Non OT/PT)

*There is a \$10 fee to register online at www.3KingsUESpecialists.com

*Costs include snacks/drinks

***Handouts will be emailed to participants prior to course to be printed out and brought to the course**

CANCELLATION POLICY:

Due to small class size, there will be NO refunds if cancellation received on or after September 16, 2017. Prior to September 16, refunds will be issued minus \$15 administration fee. If you are able to find someone to take your place, that person can pay you directly so that that you will receive a full refund. You will just need to contact me to let me know the name of the person taking your place. **3Kings UE Specialists will not refund any expenses associated with travel expenses or fees for registering online, only course costs.**

CONTINUING EDUCATION CREDIT:

*PTs and PTAs will have to submit this course individually for approval (This can also be done prior to the course. Cost is \$20 payable to the FI Board of PT). 3Kings UE Specialists will provide documentation needed to submit the course.

*Out of state therapists please contact your board for approval

*3Kings Upper Extremity Specialists will provide CEUs to Florida and Alabama OT/OTAs

Rehabilitation of Complex Upper Extremity Injuries

September 30, 2017

8-12:30pm

Location: Mayo Clinic

Cannaday Rm 1106

4500 San Pablo Rd, S.

Jacksonville, FL 32224

5.2 contact hours

Cost:\$85

Target Audience: OT/OTA/PT/PTA/CHTs of all levels

This course will present various complex upper extremity injuries involving the entire limb. Presenters will share complex cases that start with the toe and work their way all the way to the shoulder girdle. Starting with a toe to thumb transfer case study, others include gun shot wounds, complex elbow fracture/dislocation, both bone forearm fractures, nerve/vascular injuries, compartment syndrome, flexor tendons, mangled hands, etc. This course will encourage participant interactions with each other and the presenters to problem solve through these complex injuries to maximize functioning through all stages of rehabilitation.
